PROFESSIONAL SUMMARY

High-performing 8th-semester Systems Engineering student (university GPA: **70.41/100**) and certified associate in Tourism and Hotel Management. Currently working as a **QA Trainee (Quality Assurance)**, possessing a unique interdisciplinary profile that combines software testing with **Artificial Intelligence** (PyTorch) and **Full-Stack Web Development**. Proficient in content management systems (**WordPress, WooCommerce, Elementor**), no-code process optimization (**Google AppSheet, Bizagi BPMN**), enterprise resource planning (SAP/ERP), operations research (PERT/CPM), corporate finance, and **Social Media Growth Hacking** (managing and growing a personal community to over 11,000 followers). Selected as a **Global Cohort Fellow 2026** in the prestigious *Aspire Leaders Program* (Harvard). Bilingual (English B2 certified).

AREAS OF EXPERTISE & TECHNOLOGIES

- **Quality Assurance (QA):** API testing with **Postman**, test case management with **Kiwi TCMS**, functional and regression testing, bug reporting and acceptance criteria validation under Scrum.
 - **Web Development & CMS:** WordPress, WooCommerce, Elementor, Yoast SEO, Google Site Kit, HTML5, CSS3, JavaScript (ES6+), Node.js, Express.js, PHP, AJAX, Vercel, Render, Supabase.
 - **Artificial Intelligence & Data:** PyTorch, Scikit-Learn, Neural Networks (MLP), Computer Vision, OpenCV, PIL (Pillow), SQL (MySQL, PostgreSQL, MariaDB), Pandas, NumPy, Jupyter Notebook.
 - **No-Code & Process Management:** Google AppSheet, Google Sheets, Business Process Modeling (BPMN with Bizagi Modeler), Enterprise Resource Planning (ERP/SAP), Requirements Engineering (UML), Organizational Design.
 - **Operations & Financial Engineering:** Operations Research (PERT/CPM, Queueing Theory, Linear Programming), Systems Simulation, System Dynamics (TGS, Stella/Vensim), Financial Statement Analysis (Horizontal and Vertical Analysis), Economic Engineering, and Sales Forecasting.
 - **Digital Marketing:** Growth Hacking, Social Media Management, Web Analytics (Google Analytics), SEO Optimization.
 - **Languages:** Spanish (Native), English (B2 Upper Intermediate verified by EF SET, with C1 Advanced Reading score).
-

EDUCATION

Universidad Mayor, Real y Pontificia de San Francisco Xavier de Chuquisaca
(U.M.R.P.S.F.X.CH.)

- **Bachelor of Science in Systems Engineering** | 2023 - Present
 - University GPA: **70.41 / 100**
 - Officially appointed as Evaluator Jury due to outstanding academic performance in the Faculty of Sciences and Technology.
 - **Associate Degree in Tourism and Hotel Management (USFX)** | *Graduated*
 - Focused on organizational management, resource administration, and customer service excellence.
 - **High School Diploma in Sciences**
 - High School GPA: **98.3 / 100** (Valedictorian / First place academic cohort).
-

WORK EXPERIENCE

QA Trainee (Software Quality Assurance) | [Company / Project Name] | 2026 - Present

- Systematically designed, structured, and executed functional and regression test plans and test cases using **Kiwi TCMS**.
 - Conducted integration and API testing by consuming and validating RESTful service endpoints with **Postman**.
 - Logged, documented, and performed detailed tracking of bugs and issues within Scrum agile methodologies.
 - Collaborated in the analysis of functional requirements and acceptance criteria alongside the development team to ensure optimal quality standards.
 - Validated UI/UX responsive behavior across various web browsers and screen resolutions.
-

SELECTED PORTFOLIO PROJECTS

Real-Time Waste Classifier (Computer Vision - PyTorch & OpenCV)

- **Description:** Computer vision software for real-time detection and classification of recyclable waste (cardboard, glass, metal, paper, and plastic) via webcam feed.
- **Collaborators:** Developed collaboratively with Said Condori Romero.
- **Technologies:** Python, PyTorch, OpenCV, PIL (Pillow), Jupyter Notebook, Git.
- **Key Contributions:**
 - Co-designed a feedforward neural network (MLP) trained on a categorized garbage classification dataset.

- Developed a pipeline using OpenCV to capture live video feeds and isolate a centered Region of Interest (ROI).
- Integrated PIL (Pillow) library for dynamic color format conversion and image resizing (128x128 pixels).

Pneumonia Diagnostic Assistant (Deep Learning & Web Stack)

- **Description:** Computer-aided diagnostic assistant for pediatric pneumonia classification from chest X-ray images (Guangzhou Dataset).
- **Technologies:** PyTorch, Python, Flask, HTML5, CSS3, JavaScript, Render, Vercel.
- **Key Contributions:**
 - Designed and trained a Multilayer Perceptron (MLP) in PyTorch to classify medical chest X-ray images.
 - Developed a RESTful API in Flask to process client-side images and run diagnostics inference.
 - Implemented an interactive, responsive frontend web interface featuring real-time diagnostic reports.

B2C E-Commerce Platform "STORE LAN" (WordPress, WooCommerce & Elementor)

- **Description:** Transactional B2C e-commerce platform developed for the automated commercialization of exclusive apparel.
- **Technologies:** PHP (8.1+), MySQL/MariaDB, CSS3, WordPress, WooCommerce, Elementor, Google Site Kit, Yoast SEO, WhatsApp Business API.
- **Key Contributions:**
 - Structured the web portal utilizing Elementor and custom CSS3 styles to achieve a modern, responsive UI/UX.
 - Configured the WooCommerce transactional checkout flow and integrated local payment options (QR codes and bank transfers).
 - Implemented analytical telemetry using Google Site Kit and structured search indexing using Yoast SEO.
 - Connected the WhatsApp API for concurrent customer support and asynchronous validation of payment confirmations.

Boutique E-Commerce Platform "STORE LAN" (Supabase DB, Node.js & JWT)

- **Description:** Alternative full-stack boutique e-commerce system connecting a cloud-hosted distributed database with a secure backend and admin panel.
- **Technologies:** Node.js, Express, Supabase Database (PostgreSQL), JWT, Multer, Sharp, Vanilla CSS3.
- **Key Contributions:**

- Designed the relational data model in Supabase and configured Row Level Security (RLS) policies.
- Implemented robust user authentication utilizing JWT tokens and password hashing.
- Integrated image processing middlewares (Sharp) for product image optimization before uploading to Supabase Storage.

Commercial Management System "Chocolates Para Ti" (Google AppSheet & BPMN)

- **Description:** No-code mobile and desktop application designed to optimize the sales and distribution processes of the business.
- **Technologies:** Google AppSheet, Google Sheets, Bizagi (BPMN), Process Modeling.
- **Key Contributions:**
 - Mapped distribution and inventory flows utilizing Bizagi under BPMN standards.
 - Designed and deployed a mobile application in AppSheet synchronized with Google Sheets for real-time inventory control and sales tracking.

HONORS, FELLOWSHIPS & SOCIAL IMPACT

- **Aspire Leaders Program Fellowship (Aspire Institute, Harvard) - Fellow 2026:** Selected globally for the leadership development program founded by Harvard University faculty, validating critical thinking, strategic communication, and professional ethics.
- **Second Place - TechConnect (U.S. Embassy in Bolivia):** Awarded 2nd place nationally in the technology and talent program for creating and presenting an outstanding high-impact software project.
- **Fourth Place - Build with AI (Google Developer Groups - GDG Sucre 2026):** Designed AI solutions within an agile team, achieving 4th place regionally in rapid intelligent model development.
- **Team Leader & Recognition - Galactic Problem Solver (NASA Space Apps Challenge Sucre):** Led and coordinated a multidisciplinary team to design technology solutions for global NASA challenges, receiving official recognition for project excellence.
- **EF SET English Certificate (B2 Upper Intermediate):** Certified English proficiency score of 56/100, with a C1 Advanced score (65) in Reading.
- **Voluntary Civic Service and Leadership (Armed Forces of Bolivia):** Completed voluntary civic service and operational discipline training. Developed key competencies in decision-making under pressure, adaptability, and team leadership.
- **Scrum Developer / Product Owner Certification (eCampus USFX):** Verified proficiency in agile project frameworks for software development teams.
- **Incuba Unión Tecnológico Grant (Huawei, Banco Unión & Emprender Futuro):** Selected for the second stage of the tech and business incubation program.

- **freeCodeCamp Certification - Responsive Web Design:** Verified 300 hours of structured semantic and responsive frontend development.
 - **Census Agent Volunteer - 2024 Population and Housing Census (INE Bolivia):** Official registration of civic service and data collection training.
-

APPLIED ACADEMIC LEARNING (KEY COURSES)

- **System Dynamics & Modeling:** Ability to conceptualize real-world organizational problems using General Systems Theory (TGS), causal loop diagrams, and feedback loops for dynamic simulations and behavior forecasting.
- **Operations Research I & II:** Proficient in linear programming model formulation, queueing theory, and project scheduling using PERT/CPM (Critical Path Method) to maximize efficiency and minimize operational costs.
- **Enterprise Management Systems (ERP/SAP):** Comprehensive understanding of the integration of organizational information flows and business process automation (sales, warehouse, purchasing, HR) using ERP technologies.
- **Financial Statement Analysis & Economic Engineering:** Competency in Horizontal and Vertical analysis, Cash Flows of financial statements to evaluate corporate performance; formulation of cash flows and investment indicators (NPV, IRR) for tech project feasibility evaluation.
